Re: Notification and Certification Pursuant to 40 CFR 761.61(a)(3)(i)(E)  
Modified Self-Implementing Phase III Remediation Plan for Century Enterprise Center  
Scovill Street, New Milford, CT

Dear Ms. Tisa:

Attached is a copy of the Modified Self Implementing Phase III PCB Remediation Plan developed to address PCB-contamination at the Century Enterprise Center (CEC) in support of building demolition under a grant provided by the Connecticut Department of Economic and Community Development. It is submitted for review by EPA.

This Phase III plan is a continuation of the prior two phases of PCB remediation conducted at CEC and the approach is consistent with prior submittals prepared by Tighe & Bond on behalf of the Town of New Milford. As in prior phases, the plan is considered to be a modified SIP due to the verification sampling frequency proposed. This approach is consistent with and uses the frequencies specified in the Cost Analysis (EE/CA) for the building interior submitted to you on October 15, 2004.

Implementation of this plan will allow for the safe removal and proper disposal of PCB-containing materials prior to demolition activities at the site. This letter and the attached remedial plan constitute the notification required to local authorities at least 30 days prior to the date of initiating remediation under §761.61(a)(3)(i). It is the intent of the Town of New Milford to obtain competitive bids for this work and work will not commence without having received approval from EPA.

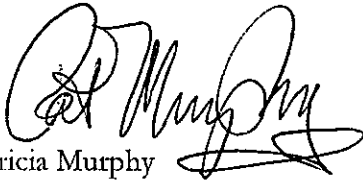

This certification is to accompany the modified Self-Implementing Phase III PCB Remediation Plan for the removal and abatement work to be performed prior to and during renovation/demolition activities at the site owned by the Town of New Milford. TRC Environmental (TRC) has prepared this plan under the provisions specified in §§761.61(c) and 761.61(a) for the remedial work to be performed at the Century Enterprise Center located on 12 Scovill Road in New Milford, Connecticut.

Certification Pursuant to 40 CFR 761.61(a)(3)(i)(E)

I certify that all sampling plans, sample collection procedures, sample preparation procedures, extraction procedures, and instrumental/chemical analysis procedures used to assess or characterize the PCB contamination at the cleanup site are on file at the offices of TRC Environmental, 21 Griffin Road North, Windsor, Connecticut, and are available for EPA inspection.

If you have any questions you may contact Edward C Doubleday, TRC, at 860-298-6245 or via email at [edoubleday@trcsolutions.com](mailto:edoubleday@trcsolutions.com).

Sincerely,

A handwritten signature in black ink, appearing to read "Patricia Murphy", with a stylized flourish at the end.

Patricia Murphy  
Mayor
